CORE CAPABILITIES

- Secure-Facility Lifecycle Integration**

Owner-side and program-team support for SCIF and SAPF requirements, acquisition, design review, construction security, accreditation preparation, turnover, and controlled change.
- Industrial Security Program Establishment and Operations**

FCL sponsorship readiness, KMP and FOCI information support, appointed roles, procedures, self-inspection, corrective action, security review preparation, and continuity.
- Security and Intelligence Mission Support**

Defined prime and subcontract work packages pursued against solicitation-specific staffing, security, mobilization, management, quality, and performance requirements.

DELIVERY BASIS

- Named contract accountability.** Each scope identifies Bedrock leadership, workstreams, deliverables, acceptance criteria, and reporting.
- Principal-led specialty judgment.** High-consequence technical work remains under qualified senior leadership.
- Traceable operating record.** Requirements, decisions, issues, actions, handoffs, and supporting records remain connected.
- Defined authority boundary.** Government, customer, licensed, appointed, and contracting officials retain their assigned authority.

PRINCIPAL PRIOR-EMPLOYMENT EXPERIENCE

- 65+**

SCIFs and SAPFs supported
- \$400M+**

Secure assets under principal responsibility
- 50+ years**

Combined relevant career experience

Metrics describe aggregate principal prior-employment experience. They are not presented as Bedrock Security Advisory Group LLC company past performance.

BUYING FIT

Principal-led specialty scopes can be defined now. Larger personnel-based requirements remain pursuit and award dependent. Bedrock can pursue a bounded prime scope or perform defined specialty workshare under a prime contractor.
